

# Scan2Deploy MotoScan Android

Data capture software for Android handheld devices

**MotoScan is the perfect companion for entry-level data capture needs**

**Inventory**

**Warehouse**

**Field Service**

## Get going right away:

- Connect your Datalogic device to WiFi or GSM
- Start Scan2deploy app on your Datalogic Android device
- Scan the barcode
- Let it install, and now you're ready to work

**Scan2deploy installation barcode**

## When installed on the device

1. Please pair your device with you profile in this configurator tool
2. In My Account (on the website), please create / define a PIN code
3. On the device, open the MotoScan app, type in your account login (example: [your-email@gmail.com](mailto:your-email@gmail.com)) and enter your PIN code
4. The device will now pair with your account and take a license from the license pool.

## **On the configurator tool** (on the website)

1. Go to My Devices. Here you will see your paired devices.
2. Go to Configurations: A default configuration is already made ready for you, if you are happy with that, you do not need to change anything - or you can: Add new configuration, build up the configuration with your needed functions, Choose the connection type, Build the menus and workflow, Save the configuration
3. Go to My Devices: The device has selected the default configuration. Change it if needed
4. Start using the scanner to capture data

If you have further questions, please look at the FAQ at the website, or send us an email: [info@moto-scan.com](mailto:info@moto-scan.com)
